COLLECTIONS OF VEGETABLE SEEDS.

FOR ONE YEAR'S SUPPLY.

The following Collections of Vegetable Seeds have been arranged to meet the requirements of those who have not time or inclination to make their own selections. They are made up in the most liberal manner, care having been taken to give all the best and most useful varieties in each section, rather than a long list of comparatively useless kinds. Should any of the undermentioned not be required, others will be sent to make up the value.

FLOWER SEEDS.

Novelties and Specialities.

In ordering FLOWER SEEDS it will be sufficient to QUOTE THE MARGINAL NUMBERS.

PRIMULA "SNOWDON."

1.

Bull's "Snowdon."

This magnificent Chinese Primrose is, without doubt, the finest white variety ever offered. Borne in immense trusses, the flowers, of wonderful substance and glistening snowy whiteness, are of great size, measuring 2½ inches in diameter, beautifully fringed and crenulated, the crimpled petals lapping and overlaying one another in such a manner as to impart to the blooms a depth that is quite remarkable.

2s. 6d. per packet.

2.

Primula sinensis fimbriata flore pleno, Bull's "Blushing Beauty."

A grand variety with large double flowers of a lovely shade of blush pink.

2s. 6d. and 3s. 6d. per packet.

PRIMULA SINENSIS FIMBRIATA FLORE PLENO, BULL'S "BLUSHING BEAUTY."

3.

Aquilegia, Bull's Long Spurred Hybrids.

This graceful variety of Columbine is perfectly hardy and produces abundantly large and elegantly shaped flowers, with long spurs which are borne well above the foliage. Comprising the most lovely shades of blue, mauve, white, yellow, scarlet, orange, and bright pink. Excellent for cutting.

1s. 6d. per packet.

1.

Clerodendron fallax.

A beautiful evergreen stove plant of dwarf habit, which produces its brilliant scarlet flowers in great profusion in Autumn and Early Spring.

2s. 6d. per packet.

BULL'S IMPERIAL CARNATIONS.

5.

Cheiranthus Allionii.

A hybrid Cheiranthus of great merit, either for the rock garden or herbaceous border. The flowers, of the most brilliant orange yellow, are borne very profusely some 9 to 12 inches in height, flowering almost persistently from April throughout the summer, its only fault being that it sometimes flowers itself to death, and for that reason is generally described as a biennial rather than a perennial, although a large percentage survives several years.

1s. per packet.

6. **Carnations, Bull's Imperial.**

A greatly improved strain of these favourite flowers, giving a wealth of bloom and variety of colour that cannot fail to please everyone. Many charming self-colours will be found among them, including almost every shade of rose, pink, salmon and crimson, with lovely combinations of flakes, bizarres, &c. Very highly recommended. 2s. 6d. and 3s. 6d. per packet.

7.

Calceolaria, Golden Glory.

The result of a cross between C. plantaginea and one of the herbaceous varieties, flowers bright golden yellow, borne on stems about 14 inches high, and very free. It is quite hardy, having stood nearly 20 degrees of frost, and will prove a very valuable garden plant. Also recommend it for greenhouse decoration. 1s. 6d. and 2s. 6d. per packet.

Celosia pyramidalis (plumosa).

A magnificent race of Celosia, affording a grand display when grown in pots for greenhouse decoration. Also splendid for bedding purposes.

8. **GOLDEN FEATHER**, 1/6 & 2/6 per pkt.

9. **CRIMSON FEATHER**, 1/6 & 2/6 per pkt.

10. **Cineraria Stellata.**

NEW CACTUS VARIETIES, MIXED.

A splendid strain of Cineraria Stellata, the petals of the flowers being beautifully twisted and fluted, comprising a wonderful range of colours, from white through shades of pink and blue to crimson and purple. The plants have the true Stellata habit, tall and graceful, and form dense masses of flower. Highly decorative for greenhouse and conservatory.

1s. 6d. per packet.

CINERARIA STELLATA.

DELPHINIUM
BULL'S HYBRIDS.

11. Delphinium Bull's Hybrids.

This magnificent strain has been saved from one of the finest collections in cultivation. The spikes are very large and handsome, varying in colour from delicate lavender to intense blue.

1s. per packet.

12. Dimorphotheca aurantiaca hybrida.

An extremely showy annual. The flowers vary in colour from the purest white to red, bluish-white tints, sulphur lemon, bright golden yellow, light orange, beautiful salmon shades from tender salmon to deep salmony orange. Even varieties with different coloured zones, such as white with a broad sulphur yellow zone around the black disc, or soft salmon with a deep salmony red inner circle are frequent, and thus enhance the beauty of these new hybrids

1s. per packet.

13. Eschscholtzia Canaliculata Mikado.

(Award of Merit, R.H.S., 1913).

Intense crimson scarlet flowers, suffused with orange which deepens towards the centre, the petals are delicately fluted and channelled, the graceful distinctive feature of the class. The habit of the plant is compact, and the flowers are produced on erect stems, and when massed a most telling effect is produced, especially in bright sunshine

1s. per packet.

14. Lupinus Polyphyllus "Excelsior."

This fine strain of Perennial Lupins will be found a grand addition to the hardy perennial section, embracing as it does a splendid assortment of colours, ranging from very pale to deep rose, and various shades of lavender, mauve and blues; a really fine mixture.

1s. per packet.

ESCHSCHOLTZIA CANALICULATA MIKADO.

LOBELIA "CELESTIAL."

15. **Lobelia "Celestial."**

A new and distinct shade of blue in Lobelia. **A beautiful clear celestial blue.** Plant very compact and free flowering. A grand addition. 1s. per packet.

16. **Mignonette, Bull's "Crimson Gem."**

A grand attractive strain of dwarf Mignonette, with extra large spikes of crimson flowers deliciously scented. The plants are very sturdy and robust. A splendid variety for pot culture. 1s. per packet.

17. **Petunia Grandiflora Superbissima Nana Mixed.**

The plants of this variety are much dwarfer than the ordinary Grandiflora strain, only growing to a height of from 12 to 15 inches, which makes it indispensible for bedding and market work. It contains a good range of colours. 1s. per packet.

18. **Pentstemon.**

BULL'S GIANT STRAIN.

This new large flowered strain is a great improvement upon the ordinary varieties. The large Gloxinia-shaped flowers are of lovely shades, varying from pure white, crimson, rose, and pink to purple and mauve, many being prettily edged and marbled. 2s. 6d. per packet.

19. **Primula malacoides.**

This very pretty New Primula is best cultivated as a pot plant in a cool green-house. The flowers are a delicate shade of lavender, and produced in great profusion in whorls on tall graceful spikes, and when cut keep fresh for several days in water. 1s. 6d. per packet.

20. **Primula Malacoides Alba.**

A pure white variety of the above. 1s. 6d. per packet.

PETUNIA GRANDIFLORA SUPERBISSIMA NANA.

POLYANTHUS, HARDY HYBRIDS.

21. **Polyanthus, Hardy Hybrids.**

BULL'S EXTRA SELECTED.

These beautiful hardy hybrid Polyanthus cannot be too highly recommended, for they produce throughout the Spring a wealth of bloom which can hardly be surpassed for beauty and richness of colouring. Amongst them will be found lovely shades of crimson maroon, rich purple and deep orange, passing through many charming variations of colour to the palest primrose and purest white.

1s. per packet.

22. **Schizanthus hybridus grandiflorus.**

Very few annuals can compare with this charming novelty, being very free-flowering and of easy culture. It attains a height of about 2½ feet, and is covered with beautiful large flowers.

1s. per packet.

23. **Schizanthus wisetonensis.**

A very charming Schizanthus of dwarf habit and wonderful floriferousness. It may be had in bloom from March till August, the colour of the flowers varying considerably, ranging from almost white with yellow eye, diversely marked with shades of pink, to full deep rose with bronze centre.

1s. 6d. and 2s. 6d. per packet.

24. **Streptocarpus, New Hybrids, Bull's Improved Strain.**

This beautiful strain is far in advance of the older varieties, both in regard to its remarkable free flowering and continuous succession of bloom, and the richness of colour and size and shape of the flowers. It embraces all the finest varieties.

2s. 6d. per packet.

25. **Large Flowering Winter Stock. "White Lady."**

A new large-flowering Brompton Stock, surpassing in beauty every white Stock obtained up to the present. About 20 inches high, and arrayed in remarkably handsome foliage, the plants throw up a massive central spike, and, branching freely in candelabra fashion, finally assume the shape of a pyramidal bouquet.

1s. 6d. per packet

STOCK, "WHITE LADY."

26. **Salvia splendens, "Fireball."**

SALVIA SPLENDENS, "FIREBALL."

A handsome dwarf flowering Salvia rarely growing more than 1½ feet high, producing freely large spikes of brilliant scarlet flowers and braets, which make a striking effect against the deep green foliage. A most beautiful variety for bedding during the Summer and Autumn

1s. 6d. per packet.

27. **Verbena hybrida gigantea.**

A new class of Verbena of extraordinary beauty, surpassing all other strains. It produces flowers and trusses of exceptional size and embraces the most brilliant shade of colour. 1s. per packet.

WALLFLOWER, "VULCAN."

28. **Wallflower, Bull's "Golden Monarch."**

A splendid Wallflower with large, bold spikes of a rich golden yellow colour. This beautiful variety will be found an excellent companion to "Vulcan."

1s. per packet.

29. **Wallflower, Bull's "Vulcan."**

This magnificent Wallflower should be grown by everyone. It is of very dwarf habit, growing only about 9 inches high, whilst the flowers are very large in size, averaging 2 inches in diameter, of the richest velvety crimson. It is without doubt the finest Wallflower of its class yet sent out.

1s. per packet.

COLLECTIONS & ASSORTMENTS OF
EXTRA CHOICE FLOWER SEEDS.

Sow Aster seed in April and May, in pans or on a spent hot-bed, in drills 6 inches asunder; when the plants are 1 inch high, prick out into a cold frame, or under hand-glasses, 3 or 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting out, when the ground is in good working order; plant in rows 1 foot apart each way. To grow Asters to perfection, a rich soil is indispensable, and during dry weather they should be watered, and a top-dressing of well-rotted manure applied early in August.

TIME OF SOWING.

HARDY ANNUALS may be sown in March and April (and for early Spring blooming in August and September), in a sheltered situation, and when up, thinned so as to keep them strong. In March they may be transplanted where they are to bloom. Before sowing, which should be done on a fine dry day, carefully prepare the soil, and in covering, regulate the thickness by the size of the seeds—small seeds should be very lightly covered. Success in growing annuals depends in a great measure upon their being properly thinned to regular distances, so as to give plenty of room for the full development of each plant; this, in too many instances, is entirely neglected, hence the dissatisfaction so often expressed as to their use.

HALF-HARDY ANNUALS may be sown in March and April, in pans, placed on a slight hot-bed, and, when strong enough, pricked out into a cool frame near the glass, where they may get hardened and well established for transplanting into their blooming quarters early in May, or potted off singly for Conservatory and Greenhouse decorations. Under favourable circumstances many varieties will bloom freely if sown in the open ground about the middle of May.

TENDER ANNUALS such as Balsams, Celosias, Thunbergias, &c., require raising in a temperature ranging from 60° to 70°. Sow in pans or pots, and place near the glass; keep the soil moist, and shade from the sun until the plants appear. When strong enough, pot off into small pots, keeping them near the glass, and admitting air on every favourable occasion.

BIENNIALS AND PERENNIALS.—The more select and tender varieties for Summer and Autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough transplanted into nursery beds, or where they are intended to bloom the following year.

In ordering Flower Seeds it will be sufficient to quote the marginal numbers.

RETARDED BULBS AND ROOTS.

Messrs. William Bull & Sons beg to draw attention to the following list of Retarded Bulbs and Roots, which, being all of best quality and selected roots only, cannot fail to give every satisfaction.

LILY OF THE VALLEY

Finest Retarded German Crowns, 10s. per 100.

These are recommended for flowering from June to December and January, being most reliable, and certain to give satisfaction. The crowns should be potted or boxed as soon as received, placed in a cool frame or other convenient place for a few days, and then removed to a temperature of 50° to 60° Fahr., when they will flower in from 20 to 24 days, giving at the same time ample supply of foliage.

LILIUM AURATUM

Fine Sound Retarded Roots, 12s. and 18s. per dozen.

LILIUM LONGIFLORUM GIGANTEUM

Sound Retarded Bulbs of this useful Lily can be supplied at 12s. and 18s. per dozen.

LILIUM SPECIOSUM ALBUM

The white flowering *Lilium speciosum* is exceedingly useful for cutting.
Splendid Retarded Bulbs at 18s. and 24s. per dozen.

LILIUM SPECIOSUM RUBRUM SUPERBUM

Splendid Retarded Bulbs of this, one of the best red varieties of the group.
18s. and 24s. per dozen.

AZALEA MOLLIS

Retarded plants of these, well budded, can be supplied at 7s. 6d. and 10s. 6d. each.

—— —— **GRANDIFLORA,** much superior to the preceding, 6d. per doz.; 3s 6d. per 100.

IRIS GERMANICA

The handsome hybrids of this beautiful section are of the greatest use for the adornment of beds and borders; the flowers are of rich and varied colours, and striped or blotched with purple or violet, on a white or yellow ground.

Choice mixed varieties, 2s. 6d. per dozen; 15s. per 100.
50 in 25 choice varieties, 24s. and 30s.
25 in 12 choice varieties, 12s. and 15s.
12 in 12 choice varieties, 4s., 6s., 9s. and 12s.

IRIS KÆMPFERI.

IRIS KÆMPFERI

Many magnificent varieties of this handsome and attractive plant have been imported from Japan; indeed, scarcely any plants in the flower garden can compare for gorgeous beauty with this section of Iris. Varying in colour from pure white to rich maroon-crimson, there are few flowers surpassing them in size and the brightness of their colouring. They succeed admirably planted on the margin of a lake or pond, or in any situation where plenty of moisture can be given. 2s. 6d. and 3s. 6d. each; 24s. and 36s. per dozen. Choice varieties, 3s. 6d. and 5s. each. Mixed seedlings, 7s. 6d. and 10s. 6d. per dozen.

ISMENE CALATHINA

A free flowering bulbous plant, bearing handsome spikes of large and very fragrant white flowers, somewhat like a Pancratium. 1s. 6d. and 2s. 6d. each.

SPIRÆAS.

SPIRÆA ASTILBOIDES.—One of the most handsome of Spiræas. The inflorescence consists of compound feathery branches of elegant white flowers. Charming and indispensable plant for pot culture. 6s. and 9s. per dozen.

SPIRÆA ASTILBOIDES FLORIBUNDA.—Produces thyrsoid spikes of bloom, much crowded with flowers. 6s. and 9s. per dozen.

SPIRÆA ASTILBOIDES GLADSTONE.—A new, large-flowering Spiræa—an improvement on all other white-flowering varieties—and one of the most beautiful of winter and spring flowering plants. The immense trusses of flowers are as white as snow, and are borne on erect, strong stalks 18 inches high. 8s. per doz.

SPIRÆA JAPONICA.—Most useful for decorative purposes. Strong clumps, 5s. per dozen.

SPIRÆA ASTILBOIDES.

SPIRÆA JAPONICA COMPACTA MULTIFLORA.—Produces a profusion of large and dense spikes of pure white flowers. Habit dwarf and compact. 5s. per dozen.

SPIRÆA PALMATA.—The bright pink Japanese Spiræa, one of the most beautiful hardy plants in cultivation, producing lovely broad corymbs of pink flowers. 7s. 6d. per doz.

SPIRÆA PALMATA ALBA.—A counterpart of *S. palmata*, except in the colour of the flowers, which are pure white; a very beautiful and elegant variety. 7s. 6d per dozen.

PINK SPIRÆAS.

Queen Alexandra, extra strong, 10s. per dozen.
Peach Blossom, extra strong, 10s. per dozen.

FOR RETARDED ROOTS OF SPIRÆAS, see page 63.

DOUBLE TUBEROSE.

"THE PEARL."

The perfectly double flowers of *Polianthes* are well known for their delicious fragrance and pearly whiteness, being admirably adapted for Button-holes, Bouquets, &c.; indeed, are of the greatest value wherever cut flowers are required. By successional plantings these lovely flowers may be had all through the Summer and Autumn. They should be potted in rich loamy soil and started in a good bottom heat, being afterwards grown on in a stove with plenty of moisture.

Selected bulbs, 2s. 6d. per dozen; 15s. per 100.
Finest picked bulbs, 20s. per 100.

The above can be supplied about the end of December.

TERMS OF SALE.

We believe that all Seeds, Bulbs, and Roots sold by us are of the description and kind specified by us at the time of sale, but, owing to the practical impossibility in many cases of being certain of this, we give no undertaking that such Seeds, Bulbs or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition.

We further give no Warranty, expressed or implied, as to their growth, description, quality or productiveness, and will not be in any way responsible for the crop. If the Purchaser does not accept the goods sold to him on these terms they are at once to be returned.
